Our approach to learning is to develop an inclusive environment for every stage in an individual's career.

Our approach to learning is to develop an inclusive environment for every stage in an individual's career.

The following resources will prepare you for the learning experience.

The following resources will prepare you for the learning experience.

Training journey

Recommended tracks to help you identify where to start your training and where to go based on your role or projects..

Certification portfolio

Available certifications and associated exams in portfolio.

Certification overview

Identify the right candidate profile with the recommended skills, knowledge, and experience.

Certification journey

Recommended steps to earn a certification, including preparation resources and opportunities for continue learning.

Certification learning path

Recommended training content to prepare for certification exams, including self-paced training and Microsoft Official Courseware (MOC) delivered by Learning Partners.

Azure training journey for IT pros (1)

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals
AZ-900

Prerequisites for Azure administrators

Start here

Implement, manage, and monitor cloud solutions

 Azure Administrator Associate
AZ-104

Implement and manage networking solutions

 Azure Network Engineer Associate
AZ-700

Manage SAP solutions on Azure

 Azure for SAP Workloads Specialty
AZ-120

Grow in role

Deliver continuous value integrating people, processes, and technologies

 DevOps Engineer Expert
AZ-400

Design and implement end-to-end cloud solutions

 Azure Solutions Architect Expert
AZ-305 [or AZ-303 + AZ-304]

Deliver virtual desktop experiences and remote apps on Azure

 Azure Virtual Desktop Specialty
AZ-140

Implement and manage secure cloud solutions

 Azure Security Engineer Associate
AZ-500

Manage on-premises hyper-converged environments with Azure Stack HCI

Bring cloud agility on-premises

 Azure Stack Hub Operator Associate
AZ-600

Want to keep learning?

Check out the
Security, Compliance,
and Identity Training
Journey

Azure training journey for IT pros (2)

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals
AZ-900

Prerequisites for Azure administrators

Grow in role

Start here

Manage Windows Server on-premises, hybrid, and IaaS platform workloads

 Windows Server Hybrid Administrator Associate
AZ-800 + AZ-801

Implement, manage, and monitor cloud solutions

 Azure Administrator Associate
AZ-104

Deliver virtual desktop experiences and remove apps on Azure

 Azure Virtual Desktop Specialty
AZ-140

Manage on-premises hyper-converged environments with Azure Stack HCI

Azure training journey for developers

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals
AZ-900

New to data solutions on Azure

 Azure Data Fundamentals
DP-900

New to AI or new to AI on Azure

 Azure AI Engineer Associate
AI-900

Grow in role

Start here

Design, build, test, and maintain cloud apps

 Azure Developer
AZ-204

Develop cloud and edge IoT solutions

 Azure IoT Developer Specialty
AZ-220

Build, manage, and deploy AI solutions

 Azure AI Engineer Associate
AI-102

Deliver cloud-native apps that store and manage data

 Azure Cosmos DB Developer Specialty
DP-420

Migrate data to the cloud

Deliver continuous value integrating people, processes, and technologies

 DevOps Engineer Expert
AZ-400

Design and implement end-to-end cloud solutions

 Azure Solutions Architect Expert
AZ-305 [or AZ-303 + AZ-304]

Azure training journey for data & AI pros

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals
AZ-900

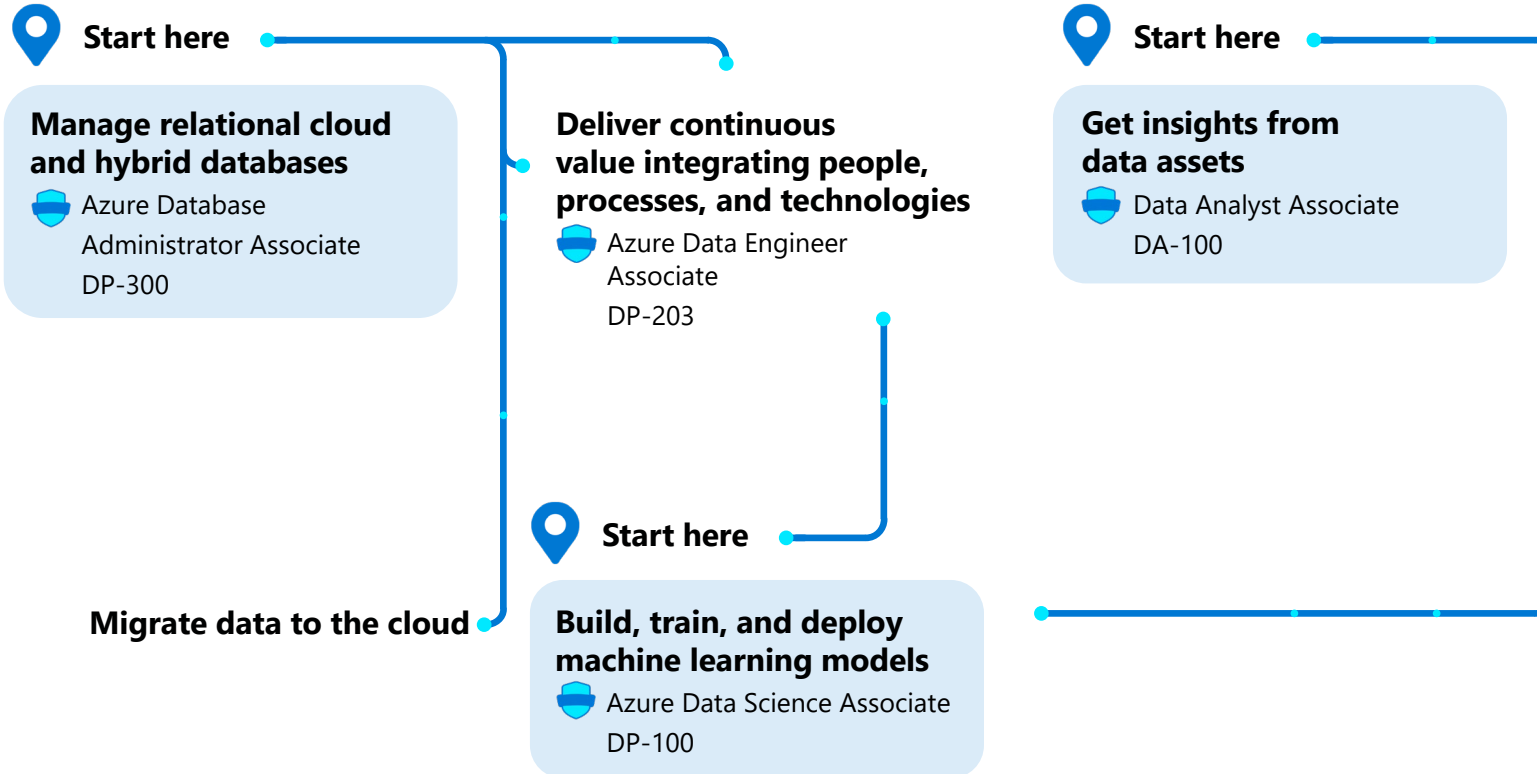

New to data solutions on Azure

 Azure Data Fundamentals
DP-900

New to AI or new to AI on Azure

 Azure AI Fundamentals
AI-900

Grow in role

Continue your **Azure** training journey

IT Pros

Migrate apps and infrastructure to the cloud

Migrating Application Workloads to Azure – Course WS-050T00

Microsoft Learn learning paths

Manage Linux on Azure

Microsoft Learn learning paths

Manage Windows Server and hybrid cloud solutions

Windows Server 2019 Administration – Course WS-011T00

Windows Server 2019 Hybrid and Azure IaaS – Course WS-012T00

Azure Stack HCI – Course WS-013T00

Microsoft Learn learning paths

Developers and Data & AI Pros

Migrate data to the cloud

Migrate SQL workloads to Azure – Course DP-050T00

Migrate NoSQL workloads to Azure Cosmos DB – Course DP-060T00

Migrate Open Source Data Workloads to Azure – Course DP-070T00

Microsoft Learn learning paths

Microsoft Azure Virtual Training Days

Grow your skills in just days

Take advantage of free, in-depth, virtual training events, and start boosting your career potential right away. Grow your technical skills through weekly events for every skill level.

Exam details

AZ-900:
[Microsoft Azure Fundamentals](#)

Skills measured:

- Describe cloud concepts
- Describe core Azure services
- Describe security, privacy, compliance, and trust
- Describe Azure pricing Service Level Agreements and Lifecycles

Knowledge and experience:

A candidate for this exam should be able to demonstrate a fundamental knowledge of cloud concepts, as well as Azure services, workloads, security, privacy, pricing, and support. In addition, a candidate should be familiar with concepts of networking, storage, compute, application support, and application development.

Certification

Pass certification exam
AZ-900 to earn this certification

Microsoft Certified:
Azure Fundamentals

Azure Fundamentals validates foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

The journey to Microsoft Certified:

Azure Fundamentals

Azure Administrator Associate

Get started at
aka.ms/AzureCerts_Admin

Exam details

AZ-104:
Microsoft Azure Administrator

Skills measured:

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Configure and manage virtual networking
- Monitor and back up Azure resources

Knowledge and experience:

A candidate for this exam should have at least six months of hands-on experience administering Azure, along with a strong understanding of core Azure services, Azure workloads, security, and governance. In addition, this role should have experience using PowerShell, Azure CLI, Azure portal, and Azure Resource Manager templates.

Certification

Pass certification exam
AZ-104 to earn this certification

Microsoft Certified:
Azure Administrator Associate

Azure Administrators implement, manage, and monitor an organization's Microsoft Azure environment.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have subject matter expertise implementing, managing, and monitoring an organization's Microsoft Azure environment.

Responsibilities for this role include implementing, managing, and monitoring identity, governance, storage, compute, and virtual networks in a cloud environment, plus provision, size, monitor, and adjust resources, when needed.

The journey to Microsoft Certified:

Azure Security Engineer Associate

Who is this certification for?

Candidates for this certification should have subject matter expertise implementing security controls and threat protection, managing identity and access, and protecting data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Responsibilities for this role include maintaining the security posture, identifying and remediating vulnerabilities by using a variety of security tools, implementing threat protection, and responding to security incident escalations.

Exam details

AZ-500:
Microsoft Azure Security Technologies

Skills measured:

- Manage identity and access
- Implement platform protection
- Manage security operations
- Secure data and applications

Knowledge and experience:

A candidate for this exam should have strong skills in scripting and automation; a deep understanding of networking, virtualization, and cloud N-tier architecture; and a strong familiarity with cloud capabilities and products and services for Azure, plus other Microsoft products and services.

Certification

Pass certification exam **AZ-500** to earn this certification

Microsoft Certified:
Azure Security Engineer Associate

Azure Security Engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Azure Stack Hub Operator Associate

Get started at

aka.ms/AzureCerts StackHubOperator

Who is this certification for?

Candidates for this certification are Azure administrators or Azure Stack Hub operators who provide cloud services to end users or customers from within their own datacenter using Azure Stack Hub.

Responsibilities include planning, deploying, packaging, updating, and maintaining the Azure Stack Hub infrastructure. They also offer hybrid cloud resources and requested services and manage infrastructure as a service (IaaS) and platform as a service (PaaS).

Exam details

AZ-600:

Configuring and Operating a Hybrid Cloud with Microsoft Azure Stack Hub

Skills measured:

- Provide services
- Implement data center integration
- Manage identity and access
- Manage infrastructure

Knowledge and experience:

A candidate for this exam should have significant experience managing and operating Azure Stack Hub environments. They should have a strong understanding of Azure, in addition to some knowledge of virtualization, networking, and identity management. They need to understand how Azure Stack Hub enables DevOps processes and the hybrid development model.

Certification

Pass certification exam **AZ-600** to earn this certification

Microsoft Certified:
Azure Stack Hub Operator Associate

Azure Stack Hub operators provide cloud services to their end users or customers from within their own datacenter using Azure Stack Hub.

Azure Network Engineer Associate

Get started at

aka.ms/AzureCerts_NetworkEngineer

Who is this certification for?

Candidates for this certification plan, implement, and maintain Azure networking solutions, including hybrid networking, connectivity, routing, security, and private access to Azure services.

Responsibilities for this role include managing networking solutions for performance, resiliency, scale, and security. They deploy networking solutions by using the Azure Portal and other methods, including PowerShell, Azure Command-Line Interface (CLI), and Azure Resource Manager templates (ARM templates).

Exam details

AZ-700:
Designing and Implementing Microsoft Azure Networking Solutions

Skills measured:

- Design, implement, and manage hybrid networking
- Design and implement core networking infrastructure
- Design and implement routing
- Secure and monitor networks
- Design and implement private access to Azure services

Knowledge and experience:

Candidates for this exam should have expert Azure administration skills, in addition to extensive experience and knowledge of networking, hybrid connections, and network security.

Certification

Pass certification exam **AZ-700** to earn this certification

Windows Server Hybrid Administrator Associate

Get started at
aka.ms/AzureCerts_WindowsServer

Who is this certification for?

Candidates for this certification should have subject matter expertise in configuring and managing Windows Server on-premises, hybrid, and infrastructure as a service (IaaS) platform workloads. They should have extensive experience working with Windows Server operating systems.

Responsibilities include integrating Windows Server environments with Azure services and managing Windows Server in on-premises networks.

Exam details

AZ-800:
Administering Windows Server Hybrid Core Infrastructure

Skills measured:

- Deploy and manage Active Directory Domain Services (AD DS) in on-premises and cloud environments
- Manage Windows Servers and workloads in a hybrid environment
- Manage virtual machines and containers
- Implement and manage an on-premises and hybrid networking infrastructure
- Manage storage and file services

Knowledge and experience:

A candidate for this exam administers core Windows Server workloads using on-premises, hybrid, and cloud technologies. They should have expertise in implementing and managing on-premises and hybrid solutions, such as identity, management, compute, networking, and storage.

AZ-801:
Configuring Windows Server Hybrid Advanced Services

Skills measured:

- Secure Windows Server on-premises and hybrid infrastructures
- Implement and manage Windows Server high availability
- Implement disaster recovery
- Migrate servers and workloads
- Monitor and troubleshoot Windows Server environments

Knowledge and experience:

A candidate for this exam configures advanced Windows Server services using on-premises, hybrid, and cloud technologies. They should have expertise in performing tasks related to security, migration, monitoring, high availability, troubleshooting, and disaster recovery.

Certification

Pass certification exams **AZ-800** and **AZ-801** to earn this certification

Microsoft Certified:
Windows Server Hybrid Administrator Associate

Windows Server Hybrid Administrators configure and manage Windows Server on-premises, hybrid, and infrastructure as a service (IaaS) platform workloads.

Products featured

Azure for SAP Workloads Specialty

Get started at

aka.ms/AzureCerts_SAPWorkloads

Exam details

Who is this certification for?

Candidates for this certification should be architects or engineers with extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the initial migration or integration and the long-term operation of an SAP solution on Microsoft Azure.

Responsibilities for this role include making recommendations on services and adjusting resources as appropriate for optimal resiliency, performance, scale, provision, size, and monitoring.

AZ-120:
Planning and Administering Microsoft Azure for SAP Workloads

Skills measured:

- Migrate SAP Workloads to Azure
- Design an Azure Solution to Support SAP Workloads
- Build and Deploy Azure for SAP Workloads
- Validate Azure Infrastructure for SAP Workloads
- Operationalize Azure SAP Architecture

Knowledge and experience:

A candidate for this exam should have extensive experience and knowledge of SAP applications: SAP HANA, S/4HANA, SAP NetWeaver, SAP BW/4HANA, OS servers for SAP applications and databases, Azure portal, Azure Resource Manager templates, operating systems, virtualization, cloud infrastructure, storage structures, high availability design, disaster recovery design, data protection concepts, and networking.

Certification

Pass certification exam **AZ-120** to earn this certification

Microsoft Certified:
Azure for SAP Workloads Specialty

Architects or engineers for Azure for SAP Workloads have extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the long-term operation of an SAP solution on Microsoft Azure.

Azure Virtual Desktop Specialty

Get started at

aka.ms/AzureCerts_VirtualDesktop

Who is this certification for?

Candidates for the Azure Virtual Desktop Specialty certification are administrators with subject matter expertise in planning, delivering, and managing virtual desktop experiences and remote apps, for any device, on Azure.

Responsibilities for this role include deploying virtual desktop experiences and apps to Azure. These professionals deliver applications on Azure Virtual Desktop and optimize them to run in multi-session virtual environments. To deliver these experiences, they work closely with Azure administrators and architects, along with Microsoft 365 administrators.

Exam details

AZ-140:
Configuring and Operating Microsoft Azure Virtual Desktop

Skills measured:

- Plan an Azure Virtual Desktop architecture
- Implement an Azure Virtual Desktop infrastructure
- Manage access and security
- Manage user environments and apps
- Monitor and maintain an Azure Virtual Desktop infrastructure

Knowledge and experience:

Candidates for this certification should have experience in Azure technologies, including virtualization, networking, identity, storage, backups, resilience, and disaster recovery. They should understand on-premises virtual desktop infrastructure technologies as they relate to migrating to Azure Virtual Desktop. These professionals use the Azure portal and Azure Resource Manager templates to accomplish many of their tasks. They might use PowerShell and Azure CLI for more efficient automation.

Certification

Pass certification exam **AZ-140** to earn this certification

Microsoft Certified:
Azure Virtual Desktop Specialty

Administrators for Azure Virtual Desktop plan, deliver, and manage virtual desktop experiences and remote apps, for any device, on Azure.

aka.ms/AzureCerts_Developer

Exam details

AZ-204:
Developing Solutions for Microsoft Azure

Skills measured:

- Develop Azure compute solutions
- Develop for Azure storage
- Implement Azure security
- Monitor, troubleshoot, and optimize Azure solutions
- Connect to and consume Azure services and third-party services

Knowledge and experience:

A candidate for this exam should have one to two years of professional development experience and experience with Microsoft Azure. In addition, they should have the ability to program in a language supported by Azure, plus proficiency in Azure SDKs, Azure PowerShell, and Azure CLI. They should also be proficient in data storage options, data connections, APIs, app authentication and authorization, compute and container deployment, debugging, performance tuning, and monitoring.

Azure IoT Developer Specialty

Get started at
aka.ms/AzureCerts IoTDev

Who is this certification for?

Candidates for this certification should have subject matter expertise creating and maintaining the cloud and edge portions of an Azure IoT solution.

Responsibilities for this role include managing the device lifecycle setup, configuration, and maintenance—using cloud services and other tools, implementing designs for Azure IoT solutions, including device topology, connectivity, debugging, and security, implementing solutions to manage, monitor, and transform IoT-related data pipelines, deploying Azure IoT Edge components, and configuring device networking on the edge.

Exam details

AZ-220:
Microsoft Azure IoT Developer

Skills measured:

- Set up the IoT solution infrastructure
- Provision and manage devices
- Implement Edge
- Implement Business Integration
- Process and manage data
- Monitor, troubleshoot, and optimize IoT solutions
- Implement security

Knowledge and experience:

A candidate for this exam should have general understanding of devices types and Azure services, including data storage options, data analysis, data processing, AI, and other platform as a service (PaaS) options. IoT developers must be able to program in at least one Azure IoT SDK-supported language.

Exam DA-100
Analyzing Data with
Microsoft Power BI

Pass certification exam DA-100
to earn this certification

Microsoft Certified:
Data Analyst Associate

Azure Cosmos DB Developer Specialty

Get started at

aka.ms/AzureCerts_CosmosDBDeveloper

Who is this certification for?

Candidates for this certification should have subject matter expertise in designing, implementing, and monitoring cloud-native applications that store and manage data.

Responsibilities include designing and implementing data models and data distribution, loading data into an Azure Cosmos DB database, and optimizing and maintaining the solution. These professionals integrate the solution with other Azure services. They also design, implement, and monitor solutions that consider security, availability, resilience, and performance requirements.

Exam details

Exam DP-420:

Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB

Skills measured:

- Design and implement data models
- Design and implement data distribution
- Integrate an Azure Cosmos DB solution
- Optimize an Azure Cosmos DB solution
- Maintain an Azure Cosmos DB solution

Knowledge and experience:

A candidate for this exam must have solid knowledge and experience developing apps for Azure and working with Azure Cosmos DB database technologies. They should be proficient at developing applications by using the Core (SQL) API and SDKs, writing efficient queries and creating appropriate index policies, provisioning and managing resources in Azure, and creating server-side objects with JavaScript. They should be able to interpret JSON, read C# or Java code, and use PowerShell.

Certification

Pass certification exam **DP-420** to earn this certification

Microsoft Certified:
Azure Cosmos DB Developer Specialty

Azure Cosmos DB Developers design, implement, and monitor cloud-native applications that store and manage data.

Decide if this is the right certification for you

Upskill with recommended training and experience

Pass required exam to earn your certification

This certification is a good fit if your responsibilities include:

- Designing and implementing data models and data distribution.
- Loading data into an Azure Cosmos DB database.
- Optimizing and maintaining the solution.
- Integrating the solution with other Azure services.
- Designing, implementing, and monitoring solutions that consider security, availability, resilience, and performance requirements.

aka.ms/AzureCerts_CosmosDBDeveloper

Azure Cosmos DB developers design, implement, and monitor cloud-native applications that store and manage data.

Instructor-led Training

Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB

DP-420T00 | 4 days

Get started with Azure Cosmos DB SQL API

2 modules

Connect to Azure Cosmos DB SQL API with the SDK

2 modules

Execute queries in Azure Cosmos DB SQL API

2 modules

Integrate Azure Cosmos DB SQL API with Azure services

3 modules

Design and implement a replication strategy for Azure Cosmos DB SQL API

3 modules

Monitor and troubleshoot an Azure Cosmos DB SQL API solution

4 modules

Create server-side programming constructs in Azure Cosmos DB SQL API

2 modules

Exam DP-420

Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB (beta)

Pass certification exam **DP-420** to earn this certification

Microsoft Certified:
Azure Cosmos DB Developer Specialty

Self-paced online training on Microsoft Learn

Plan and implement Azure Cosmos DB SQL API

3 modules

Access and manage data with the Azure Cosmos DB SQL API SDKs

3 modules

Define and implement an indexing strategy for Azure Cosmos DB SQL API

2 modules

Implement a data modeling and partitioning strategy for Azure Cosmos DB SQL API

2 modules

Optimize query and operation performance in Azure Cosmos DB SQL API

3 modules

Manage an Azure Cosmos DB SQL API solution using DevOps practices

2 modules

Azure AI Engineer Associate

Get started at
aka.ms/AzureCerts_AIEngineer

Who is this certification for?

Candidates for this certification should have subject matter expertise building, managing, and deploying AI solutions that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework.

Responsibilities for this role include participating in all phases of AI solutions development—from requirements definition and design, to development, deployment, maintenance, performance tuning, and monitoring.

Exam details

AI-102:
Designing and Implementing a Microsoft Azure AI Solution

Skills measured:

- Plan and manage an Azure cognitive services solution
- Implement computer vision solutions
- Implement natural language processing solutions
- Implement knowledge mining solutions
- Implement conversational AI solutions

Knowledge and experience:

A candidate for this exam should be proficient in C#, Python, or JavaScript and should be able to use REST-based APIs and SDKs to build computer vision, natural language processing, knowledge mining, and conversational AI solutions on Azure. In addition, a candidate should understand the components that make up the Azure AI portfolio and the available data storage options. A candidate also needs to understand and be able to apply responsible AI principles.

Certification

Pass certification exam **AI-102** to earn this certification

Microsoft Certified:
Azure AI Engineer Associate

Azure AI Engineers build, manage, and deploy AI solutions that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework.
